1. Claims 14-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 14 and 17, it is unclear what is meant by "a part of the resulting magnetic field" and how the part is selected.

In claim 25, it is unclear what is meant by "a part of the first contact free measurement of the resulting magnetic field" and how the part is selected.

In claim 26, it is unclear what is meant by "a part of the corrected field value" and how the part is selected.

In claim 28, it is unclear it is unclear what is meant by "a part of the resulting magnetic field" and how the part is selected. Furthermore, it is unclear what "means for determining a part of the resulting magnetic field ..." and "means for determining a critical current of the conductor..." represent. Are they shown in any of drawings?

The dependent claims not specifically address share the same indefiniteness as they depend from rejected base claims.

2. Claims 14-33 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is unclear from the original specification which device is used for "determining a part of the resulting magnetic field out of phase with the external magnetic field", "determining the

critical current of the conductor from the determined part of the resulting magnetic field out of phase with the external magnetic field", determining a part of the first contact free measurement of the resulting magnetic field out of phase with the external magnetic field", "determining the critical current of the conductor from the determined part of the resulting magnetic field out of phase with the external magnetic field" as recited in claims 14,17,25 and 28. Furthermore, it is also unclear from the specification which device is used for "determining a part of the corrected field value that is out of phase with the external magnetic field" and "determining a critical current of the conductor from the determined part of the corrected field value" as recited in claim 26.

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

- 4. Applicant's arguments with respect to claims 1-18 filed on07/18/03 have been considered but are most in view of the new ground(s) of rejection.
- 5. Since claims are indefinite, no art has been applied to instant claims 14-33.
